

FSC® Chain of Custody Manual

The main activity of ABETO DESIGN S.L. is the manufacturing and installation of interior furniture, mostly made from wood, a natural, renewable, and recyclable material. This demonstrates our commitment to the environment and responsible consumption.

We want to extend this commitment by implementing and maintaining the FSC Chain of Custody certification scheme, in accordance with its Standards and Brand Usage Rules currently in force, to promote the consumption of wood from well-managed forests: environmentally responsible, socially beneficial, and technically viable. This commitment includes the labor, safety, and health requirements defined by the FSC and Spanish legislation, ensuring the absence of child or forced labor, non-discrimination in employment, and respect for the associative and union rights of our workers.

We also aim to meet the demand of our customers, who, like us, are aware of the need to promote these standards and convey their message to the consumer.

This commitment will be communicated to employees, suppliers, and customers and will be made available to any other interested parties upon request.

Additionally, information will be provided to those who request it regarding the certified products we can offer and our procedure for receiving comments, complaints, or claims.
